

# Naloxone

Over 60% of people who died from drug overdoses were using **alone**.

Naloxone is only useful if there's someone there to administer it.

**Complete an overdose safety & rescue plan today.**

# Do you use heroin alone?

Evidence suggests that 60%+ of fatal heroin overdoses occur when people have been using alone.

**Naloxone is only effective if there is someone there to administer it.**

Do you or someone you know ever use alone? Have you / they ever encountered an overdose?

Could you / they rethink how you / they use so that someone could respond with Naloxone if needed?

Are you aware of the increased risks that some synthetic opioids pose with regards to overdose?
