

The background features a central swirl graphic in shades of orange and yellow, enclosed in a dashed blue circle. Surrounding this are various other circles: a large orange ring with a dashed red inner circle, a solid yellow circle, a small pink circle, a green circle with a dashed green border, a large teal ring, a small teal circle, and a large green circle with a white center. The text is centered in the middle of the slide.

IMS Quarterly Monitoring Report Quarter 4: 2020-21

INTRODUCTION:

Hi everyone, despite the easing of lockdown restrictions we hope you're all continuing to stay safe. We realise it's been a challenging year so far and would like to thank you for continuing to enter or upload your IMS activity. This IMS Quarterly Monitoring Report includes activity for the fourth quarter of 2020/21 as well as the total figures for the latest 12 month rolling period (1st April 2020 - 31st March 2021). This in effect forms the preliminary figures for the 2020/21 financial year. However we are still waiting on some data and the final figures will be included in the IMS annual report which will be published later in the year.

New IMS Covid-19 Vaccination survey: For the last 12 months, we have included a pop-up survey in IMS which asks individuals about Covid-19 restrictions and how they have been affected by them. We are now replacing this with a new pop-up survey around vaccinations. As a vulnerable cohort with significant physical health needs, particularly around respiratory conditions, it's important that we can establish what vaccination coverage is for this population. The survey is just one question which asks whether a client has had one or two vaccinations, or has refused a vaccination. The survey should only need one click to submit so we do ask you please to complete it for each client accessing needle exchange or brief intervention wherever possible.

Needle & Syringe Programme (NSP) activity reports: This report which excludes 'Brief Intervention only' clients provides a detailed view of NSP provision. In order to support detailed monitoring at the current time when use of NSP has been affected by the pandemic, this report includes monthly activity figures for all NSP providers.

<https://ims.ljmu.ac.uk/ins-activity>

Drug Related Deaths module: IMS includes a dedicated module which is used by teams across all Local Authority for recording information associated with a drug related death. We have recently released an update to this module to improve the functionality, and particularly encourage services to add details to the 'additional information' tab where you have more relevant information on a case. More details about the changes are found in this short user guide: <https://ims.ljmu.ac.uk/PublicHealth/reference/IMS-DRDDataEntryGuide-v2.0.pdf>

IMS & home working: Our IMS team are working remotely with access to all our usual systems to support IMS, and we are contactable via both email and our usual phone numbers.

Take care, and as always thank you for your continued support of

CLIENT COHORT SUMMARY: LIVERPOOL

Number of individuals who accessed syringe exchange services and non-structured interventions in the last quarter, and for the full year to date (rolling 12 months), shown for all individuals combined and separately for 'Injecting Drug Users' (IDU) using Psychoactive drugs, 'Injecting Drug Users' using Steroids or IPEDs (Image & Performance Enhancing Drugs), and for Non-injecting 'Brief Intervention' (BI) clients using either Alcohol or Other Drugs.

1,783 (5,018)	942 (2,402)	302 (988)	539 (1,628)
All Individuals	PWID: Psychoactive Drug	PWID: Steroid & IPEDs	BI: Drug or Alcohol

CLIENT NUMBERS & PREVALENCE ESTIMATES: LOCAL AUTHORITY AREAS

Comparison of client numbers and estimated prevalence (per 1,000 population) by each Local Authority area for the full year (rolling 12 month period). Shown for all individuals combined and separately for each client cohort group.

	All Individuals	Rate per 1,000 pop	PWID Psychoactive Drugs	Rate per 1,000 pop	PWID Steroid & IPEDs	Rate per 1,000 pop	BI: Drug or Alcohol	Rate per 1,000 pop
