

INTRODUCTION:

Hi everyone. Welcome to the Q2 report for the current financial year for IMS. Thank you to all of you who attended the pre-launch event on November 12th which took place at the LJMU Redmonds Building in the city centre (and commiserations to those of you who didn't make it due to train problems). The feedback from the event from both services and commissioners (and our colleagues in PHE!) was very positive, even if the telephone voting became a bit Eurovision by the end of the session. The first services have begun piloting the new IMS Online data collection tool – Genie in the Gutter, The Basement and the Armistead – and have so far reported no major issues with the system.

Again, the feedback we've had from the services has been overwhelmingly positive with the tool running stably and speedily on even slower connections. We will be rolling out the software to all services over the next few months with the intention that all agencies currently using Goliath, Baker or Laika will be migrated over to the new system by 1st April 2015. The 2013-14 Annual Report will be published before the end of the year containing detailed information from the monitoring system across the region. In the meantime, thank you for your ongoing support, have a good Christmas and all the best for 2015.

## ADDITIONAL NOTES

The figure for those accessing services includes all individuals who had an intervention, an onward referral, a well being review, a health screening, or a syringe exchange transaction during the quarter.

The number of individuals shown Year to Date (YTD) is not necessarily a sum of the quarterly figures as the same individual may have presented in more than one quarter, but they will only be counted once in the YTD number. Likewise the Local Authority total is less than a sum of the agency figures where an individual has presented at multiple services during the period.

The activity summary shows the number of activities delivered by each service.

The Year to Date (YTD) activity figure is cumulative and should represent the sum of each quarterly figure, unless any retrospective changes are made to the data by the agency following their quarterly data submission.

The client review data section includes all clients who have accessed services at any time during the current year to date, and details information that is collected in the client assessment review, such as Primary Substance of use, Accommodation status, Employment Status, and Parental status.

Where the client has multiple assessments completed, only the last completed assessment has been used.
