

INTRODUCTION:

Hello everyone. This is the final report of the 2014/15 financial year which covers all activity we received by the submission deadline in April – it's the first quarterly report to include not just all agencies but also all pharmacies reporting to the IMS. In summary for the 14/15 year (although please note that these figures are subject to revision), there were 27,893 individuals reported to IMS across Cheshire and Merseyside of which 83% were male. From this pool of individuals, there were 64,980 interventions, 7,373 referrals and 70,591 Syringe Exchange transactions recorded.

Of those clients where a primary substance was recorded, 35% indicated Steroids and other PIEDS as their primary substance, 30% Alcohol and 23% Heroin.

We will begin work shortly on our 2014/15 annual report which will drill down into these numbers in greater detail, and further information will also be available via our website over at [www.cph.org/ims](http://www.cph.org/ims) We will also be looking at how best to report on outcomes moving forward. IMS is becoming a really strong dataset which enables us as a region to properly plan services and to identify any issues locally - thanks as always for your diligence and support in entering your data in a timely and accurate manner, and for feeding back any issues or comments you might have.

## ADDITIONAL NOTES

The figure for those accessing services includes all individuals who had an intervention, an onward referral, a well being review, a health screening, or a syringe exchange transaction during the quarter.

The number of individuals shown Year to Date (YTD) is not necessarily a sum of the quarterly figures as the same individual may have presented in more than one quarter, but they will only be counted once in the YTD number. Likewise the Local Authority total is less than a sum of the agency figures where an individual has presented at multiple services during the period.

The activity summary shows the number of activities delivered by each service.

The Year to Date (YTD) activity figure is cumulative and should represent the sum of each quarterly figure, unless any retrospective changes are made to the data by the agency following their quarterly data submission.

The client review data section includes all clients who have accessed services at any time during the current year to date, and details information that is collected in the client assessment review, such as Primary Substance of use, Accommodation status, Employment Status, and Parental status.

Where the client has multiple assessments completed, only the last completed assessment has been used.
